**No Hassle Warranty - No waiting. No shipping charges.**

Our commitment to high-quality products and customer service is demonstrated by our industry exclusive "No Hassle" warranty.

In the unlikely event that an Amprobe Test Tool requires warranty service, any of our local dealers are authorized to replace it, on the spot. (\$500 MSLP limit)

The product warranty is stated in the user's manual that comes with each product and can be downloaded from www.Amprobe.com

For warranty service, please contact the Amprobe Service Department at 1-877-AMPROBE.

Clamp Meters

Innovation

Amprobe invented the first clamp meter and the innovation has never stopped. The Amprobe Navigator™ Clamp Meter series serves as the first line of defense in any industrial setting. Designed for one-hand operation, our cutting edge navigation system eliminates push buttons with an easy to use joystick allowing you to select functions directly on the large backlit display.

TOP RATED 5 Out of 5 Stars

See The Top Rated Navigator™ Clamp Meter Series, read the five star reviews at www.Amprobe.com.

Clamp Meter Selection Guide

Choose the clamp meter that's right for your job, from basics to industrial.

[illegible]

CAT IV Navigator™ Clamp Meters

See a snapshot of harmonics and power quality measurements to help determine if specialized equipment is needed. Use a wide range of measurement options: min/max, power factor and ac/dc. Make quick, accurate measurements with one hand using the joystick control.

- Fast response
- Inrush current measurement for motors
- Low-pass filter for variable frequency drives
- Phase rotation indication
- VolTect™ non-contact voltage detection
- Continuity beeper
- Min, max and smart data hold
- Peak hold
- Auto flashlight when clamping
- Large backlit display with analog bar graph
- Auto power-off
- Overmold body to absorb shock – drop-proof to 4' (1.2 m)
- True-rms provides accuracy and dependability

FEATURE	ACD-50NAV	ACDC-52NAV	ACDC-54NAV	BEST ACCURACY

Clamp Meters

Swivel™ Clamp Meters ★★★★★ TOP RATED

Get fast and easy testing for HVAC and electrical applications. See measurements in tight or inconvenient spaces with the patented 180-degree rotating head design of Amprobe's Swivel™ Clamp Meters. The slim jaw puts all features within reach for one-handed operation.

- 180-degree rotating head
- VolTect™ non-contact voltage detection
- Audible continuity
- Auto ranging for quick checks
- Manual ranging for precise measurements
- Data hold

ACD-10 PLUS Clamp Multimeter with Uniquely Thin Jaws

With thinner jaws than standard clamp multimeters (only 0.4"/10 mm thick), the ACD-10 PLUS, and ACD-14 PLUS, allow access to tight measurement areas and still accommodate conductors up to 1" (25 mm).

ACD-14 PLUS and ACD-14 TRMS-PLUS Dual Display Digital Clamp Multimeters

The professional's choice for both HVAC and electrical applications with a complete set of measurement features including dual displays that allow you to view amperage and voltage measurements simultaneously.

- Continuity buzzer
- Hold and maximum reading functions
- Auto ranging
- Auto power off and low battery indication
- Rubber over-molded case
- Frequency is measured by either jaws or test leads (ACD-10 PLUS only)
- Microamps for testing flame sensors (ACD-14 PLUS only)
- Diode test (ACD-14 PLUS and ACD-14 TRMS-PLUS only)
- True-rms for more accurate readings in noisy environments (ACD-14 TRMS-PLUS only)

FEATURES	ACD-10 PLUS	ACD-14 PLUS	ACD-14 TRMS-PLUS

ACDC-3400 IND CAT IV Clamp Meter

If an industrial or utility testing application demands a higher level of safety, reach for this CAT IV rated Clamp Meter.

- Extra large jaws accommodate wide wires
- Peak hold
- Audible continuity
- Auto and manual ranging
- Auto power-off
- Data hold
- Backlight
- Diode test
- True-rms for accuracy and dependability

FEATURE	ACDC-3400 IND
DC Voltage	660.0 mV, 6.600 V, 66.00 V, 660.0 V, 1000 V
AC Voltage	660.0 mV, 6.600 V, 66.00 V, 660.0 V, 750 V
AC Current	66.00 A, 660.0 A, 1000 A
DC Current	660.0 A, 1000 A
Resistance	660.0 Ω , 6.600 k Ω , 66.00 k Ω , 660.0 k Ω , 6.600 M Ω , 66.00 M Ω
Capacitance	6.600 nF, 66.00 nF, 660.0 nF, 6.600 μ F, 66.00 μ F, 660.0 μ F, 6.6 mF
Frequency	66.00 Hz, 660.0 Hz, 6.600 kHz, 66.00 kHz, 660.0 kHz, 1.000 MHz
Continuity	•
Accommodates Conductors	Up to 2.0" (51 mm) in diameter

INCLUDED ACCESSORIES: Deluxe carrying case, test leads, test leads, battery (installed), users manual.

RS-1007 PRO CAT IV Analog Clamp Meter

Take these clamp meters to extremes. Digital clamp meters have LCD screens that tend to freeze below 32°F (0°C), but the Amprobe analog clamp meters can take extreme heat or cold and keep on measuring amps and volts without problems or batteries.

- Easy-to-read rotary scale
- Works in temperatures from 5°F to 122°F
- Does not need batteries to measure volts or amps
- Operates on 50Hz and 60Hz frequencies
- Pointer lock - data hold

FEATURE	RS-1007 PRO
AC Voltage	150 V, 300 V, 600 V
AC Current	15 A, 40 A, 100 A, 300 A, 1000 A
Resistance	1000 Ω
Continuity	•
Accommodates Conductors	up to 1.88" (47 mm) in diameter

INCLUDED ACCESSORIES: Test leads, battery (installed, for resistance measurement only), users manual, carrying case

RS-1007 PRO

Clamp Meters

AC50A

LH41A

AC50A Leakage Current Clamp Multimeter

Great for applications requiring measurement of leakage and fault currents, this clamp measures low AC current down to microamps.

- Min/max control to see largest/smallest values in a series of measurements
- Relative value measurement to determine differentials
- Data hold to freeze measurement value on the display
- Digital display with analog bargraph
- Auto power-off to save battery life
- Minimum resolution 0.01 mA

LH41A AC/DC Low Current Clamp Meter

Take precise low-current measurements with 1 mA resolution.

- Data hold
- Auto power-off
- Auto zero button to zero display for DC

FEATURE	AC50A	LH41A
AC Voltage	400.0 V	—
AC Current	40.00 mA, 400.0 mA, 4.000 A, 40.00 A, 60.0 A	4.000 A, 40.00 A
DC Current	—	4.000 A, 40.00 A
Resistance	400 Ω	—
Continuity	•	—
Accommodates Conductors	up to 1.2" (30 mm) in diameter	up to 0.78" (20 mm) in diameter

INCLUDED ACCESSORIES: Batteries (installed), users manual, test leads (AC50A only), carrying case (AC50A only)

ACDC-400

ACD-6 PRO

ACDC-400 Digital Clamp Multimeter

The ACDC-400 is a full-featured clamp suitable for facility maintenance to field service with wide measurement capabilities.

- 10 mA resolution in the 40 A range
- 4000-count, easy-to-read display
- Analog bar graph
- Autoranging
- Data hold
- Auto power-off

FEATURE	ACDC-400
AC Voltage	400.0 mV, 4.000 V, 40.00 V, 400.0 V, 600 V
DC Voltage	400.0 mV, 4.000 V, 40.00 V, 400.0 V, 600 V
AC Current	40.00 A, 400.0 A
DC Current	400 A
Resistance	400.0 Ω, 4.000 kΩ, 40.00 kΩ, 400.0 kΩ, 4.000 MΩ, 40.00 MΩ
Accommodates Conductors	up to 1.18" (30 mm) in diameter

INCLUDED ACCESSORIES: Users manual, carrying case, batteries (installed), test leads

ACD-6 PRO Digital Clamp Meter

This high-current clamp doubles as a multimeter for AC and DC voltage, resistance and continuity.

- Auto and manual ranging
- Relative zero mode
- Auto power-off
- Data hold
- Diode test
- Audible continuity

MEASUREMENTS	ACD-6 PRO	BEST ACCURACY
DC Voltage	400.0 mV, 4.000 V, 40.00 V, 400.0 V, 600 V	1.0% + 3 LSD

ACDC-100 and ACDC-100 TRMS Digital Clamp Meters

Accuracy, quality, and proven technology meet in the ACDC-100 and ACDC-100 TRMS offering superior ac/dc measurement capabilities, highest product quality and enhanced ergonomic design.

- Relative zero mode
- Auto power-off
- Data hold
- MAX capture function for inrush current measurements (30 mS response)
- Diode test
- Audible continuity
- "Third hand" test probe holder
- Rubber over-molded case with built-in probes storage
- True-rms and backlight (ACDC-100 TRMS only)

FEATURE	ACDC-100	ACDC-100 TRMS

ACD-15 TRMS-PRO

ELS2A AC Line Splitter

Measure the current on a 2-wire or 3-wire power cord up to 15 A without having to cut off the plug and separate the conductors, or open electrical boxes on 120 V lines. Use with any Amprobe clamp meter.

- Two measurement loops, 1X and 10X for increased sensitivity
- Built-in voltage measurement jacks to check for voltage sags and surges
- Rated for 120 V, 15 Amps

ELS2A

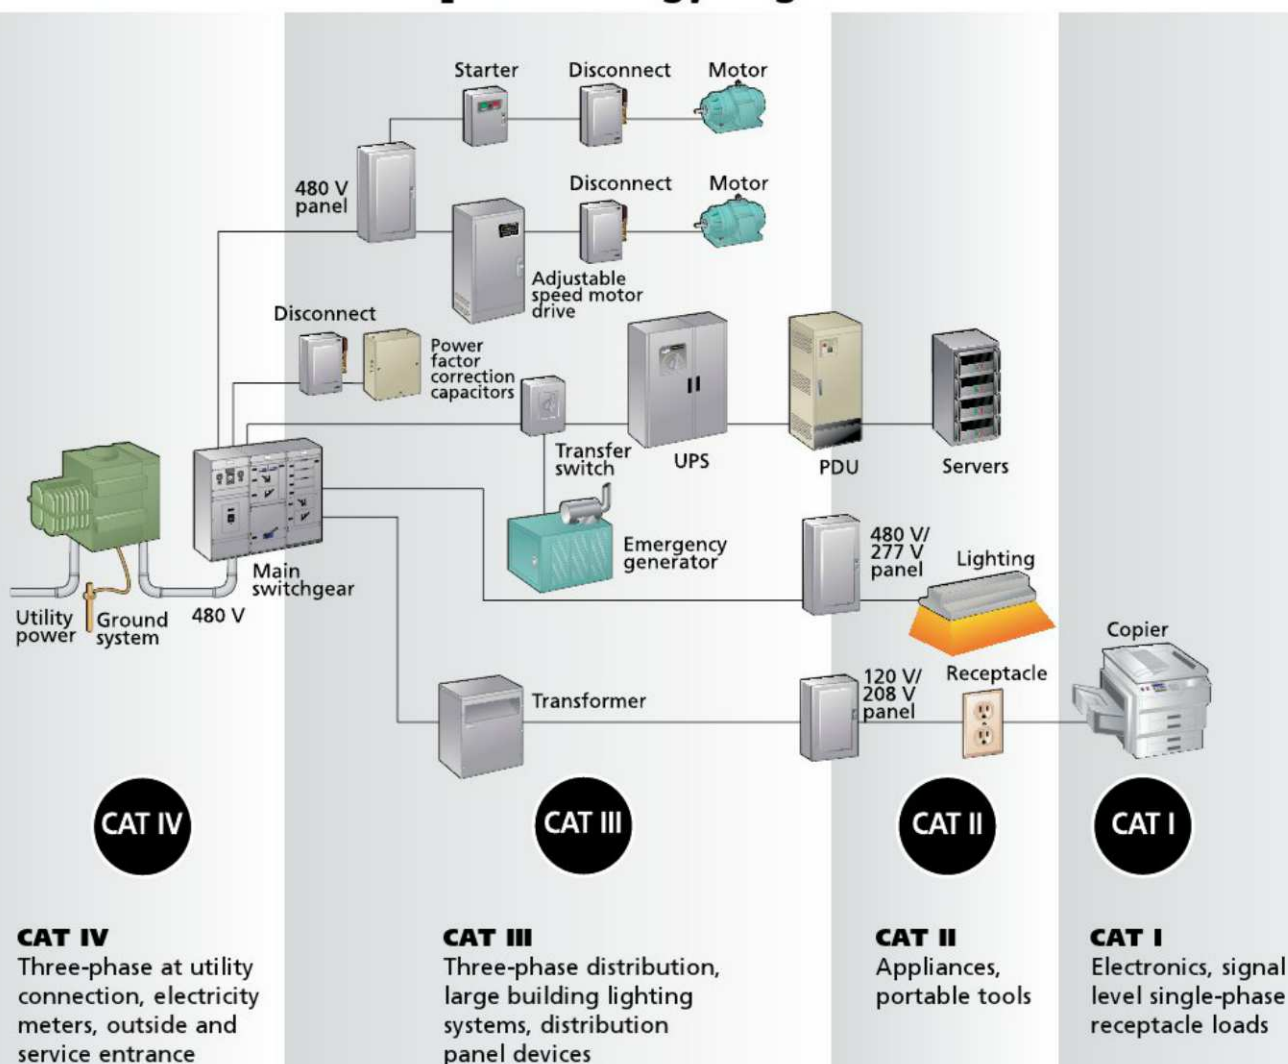

For ordering information see page 63. For detailed specifications go to www.Amprobe.com

Safety Reference Guide

International safety standards

Test equipment must be designed to protect people who work in the high-voltage, high-current environments. In order to prevent injury, the International Electrotechnical Commission (IEC) develops international general standards for safety of electrical equipment for measurement, control and laboratory use. The most current standard 61010 specifies overvoltage categories for electrical distribution systems. The category rating increases based on the closeness to the power source and a higher level of user protection that is required from test equipment.

Proposed Energy Regions*

* Category ratings per IEC 61010-1
Category boundaries may not be exact

Digital Multimeters

Choice

Part of a great value is getting exactly what you need in a tool – nothing more or less. With the Amprobe broad selection of digital multimeters, you can find the perfect match for any job. From the industrial meters safety-rated for CAT IV electrical environments, to simple pocket-sized meters, you'll find a digital multimeter that fits your needs.

Stray Voltage and What to Do About It.

Solve stray voltage problems with the Amprobe True-rms AM-570

The most common place to encounter stray voltage is in unused cable runs or electrical wiring in existing conduit. When buildings are built and wired, electricians often pull extra wire through and leave it unconnected for future use.

For most electrical measurements, a high impedance multimeter is best, since you don't want the meter loading the circuit and affecting the circuit measurements. When dealing with the capacitive coupling, however, a high impedance meter between ground or neutral to the unconnected cable or open connection will indicate some amount of voltage present. This measured voltage reading may be as high as 50% of the energized voltage in the same proximity.

Is this voltage real? Yes, but it's a static voltage, containing no real energy or current flow. Yet this stray voltage reading presents a real source of confusion. Is the connection hot or not? The AM-570 Industrial Digital Multimeter solves this problem. Designed with a high impedance (low Z) function, the AM-570 provides a low impedance load to the measured circuit, desensitizing the meter to low energy and spurious sources of interference. If the measurement points are energized with a "hard" voltage, the meter will simply display the voltage reading. If the measurement points contain a stray or ghost voltage, the meter will read very close to zero volts, indicating the circuit or connection is not energized.

The True-rms AM-570 also includes VolTect™ non-contact voltage detection and dual thermocouples for measuring the high and low side of an AC system which calculates temperature differential effortlessly.

AM-570

★★★★★ TOP RATED

"The features measure up to a lot of other industrial meters with big, well-known names, and yet there is more here than many of them - like dual temperature probes, non-contact voltage detection, and frequency/duty measurement. One of the best features is the LCD backlight - it is very bright and uniform throughout the display, and brighter than several meters costing 4 to 5 times as much."

customer review**

AM-500 Series Digital Multimeters

Best-in-class autoranging, digital multimeters with features for residential, commercial electrical, industrial and HVAC applications. Features include True-rms, dual thermocouples for measuring temperature differential, low impedance to detect stray voltage, low pass filter to accurately measure variable frequency drives and a built-in flashlight.

- Five autoranging multimeters safety rated up to CAT IV 600 V
- True-rms
- VoltTect™ non-contact voltage detection verifies voltage presence
- Measure differential temperature easily with dual thermocouples
- Detect stray voltages with low impedance and low-pass filters
- Easily operate with large backlit LCD display, built-in flashlight and rubber tilt stand

AM-570

AM-510 Commercial/Residential Multimeter

Designed for light commercial and advanced residential applications, the AM-510 enables you to re-wire an electrical panel, install light fixtures, troubleshoot home appliances, electrical sockets and automotive electrical issues.

- Voltage up to 600 V ac/dc, ac/dc current and resistance
- Frequency, capacitance, duty cycle
- VolTect™ non-contact voltage detection
- Audible continuity, diode test, backlit LCD display, data hold and relative zero mode

AM-510

AM-520 HVAC Multimeter

Designed for HVAC professionals, quickly measure temperature, micro amps and capacitance. The AM-520 measures a complete range of electrical parameters and features VolTect™ non-contact voltage detection.

- Voltage up to 600 V ac/dc, ac/dc current and resistance
- Frequency, capacitance, duty cycle for troubleshooting applications
- VolTect™ non-contact voltage detection
- Audible continuity, diode test, backlit LCD display, data hold, relative zero mode

Replacement part: TPK-59

AM-520

AM-530 True-rms Electrical Contractor Multimeter

Quickly troubleshoot voltage, perform repairs, run new wiring, check continuity on electrical connections, identify blown fuses, check motors or check transformers. The AM-530 is the perfect multimeter for the professional electrician.

- Voltage up to 600 V ac/dc, ac/dc current, resistance, frequency, capacitance, and temperature.
- True-rms
- VolTect™ non-contact voltage detection
- Audible continuity, diode test, backlit LCD display, data hold, relative zero mode

Replacement part: TPK-59

AM-530

AM-560 Advanced HVAC Multimeter

Measure a complete range of electrical parameters for HVAC applications with dual thermocouples for taking differential temperature measurements, low pass filter for variable frequency drives and capacitance. It features micro amps for flame sensor troubleshooting. The AM-560 is the choice multimeter for a professional HVAC technician.

- AC/DC Voltage up to 1000 V, ac/dc current, resistance, frequency, capacitance, temperature, duty cycle.
- Dual thermocouple for simultaneous temperature measurements on low/high side of HVAC systems
- Low pass filter for variable frequency drives
- VolTect™ non-contact voltage detection
- Audible continuity, diode test, backlit LCD display, data hold, relative zero mode

Replacement part: TPK-62

AM-560

AM-570 Industrial Multimeter

For professional electricians who need to maintain service or troubleshoot advanced electrical systems, the AM-570 is packed full of features such as true-rms, dual thermocouples, a low impedance mode, and a low pass filter to accurately take measurements on variable frequency drives.

- AC/DC Voltage up to 1000 V, ac/dc current, resistance, frequency, capacitance, temperature, duty cycle.
- Low Z – to detect stray voltages
- Low pass filter for variable frequency drives
- VolTect™ non-contact voltage detection
- Audible continuity, diode test, backlit LCD display, data hold, relative zero mode

Replacement part: TPK-62

AM-570

38XR-A

XR Series Multimeters

The XR Multimeter Series lets you customize features and functions for your electronic, electrical, plant maintenance or HVAC applications.

HVAC contractors and field service technicians have a choice of the manual ranging 37XR-A with capacitance or the auto-ranging, True-rms 38XR-A with temperature and backlight.

For electronics troubleshooting, the True-rms 37XR-A offers component and logic test. If you're an engineer, designing or troubleshooting industrial automation and control systems, check out the 38XR-A, a True-rms multimeter with bright blue backlight and an optical PC interface.

- Autoranging
- Min/max and data hold
- Separate door for easy battery and fuse access
- Low battery indication
- Relative, peak, and average and data hold
- Analog bar graph
- Input warning tone when test leads are in wrong jack
- Auto power-off to save battery life
- VolTect™ Non-contact voltage detection

HD110C and HD160C Heavy-duty Multimeters

Built for harsh environments, these unusually rugged meters offer extra features and superior protection that keep them operating reliably in heavy-duty applications.

- Measures up to 1500 V dc and 1000 V ac and withstands transients up to 12 kV (CAT IV 1000 V) – unmatched by other digital multimeters
- IP 67 rated and sealed to prevent dirt, grime and moisture from entering the case and causing inaccurate readings or damaging shorts
- Tough, fire-retardant thermoplastic resists grease and chemical spills and other environmental hazards
- All sensitive components are shock-mounted for drop resistance to at least eight feet
- Magne-Grip™ holder with magnetic hanging strap frees both hands for work
- Automatic polarity indication
- Superior 10,000 count resolution with bar graph
- Bright backlight for superior visibility
- Auto power-off to save batteries plus low battery indication

"Great product with unlimited features"

"A workhorse that does everything I need and then some."

- HD160C customer reviews

Why you need a True-rms reading multimeter.

Answer: True-rms instruments are accurate on any AC waveform. There are two basic AC measuring systems. One is "average sensing, RMS indicating." This is the most common system because it is affordable and easy to manufacture. An instrument with this type of measuring system measures the average of a sine wave, and then multiplies it by 1.112, allowing the instrument to indicate RMS. This measuring system is only accurate on sine waves.

The second measuring method is called "RMS Sensing, RMS Indicating." An instrument with this type of measuring system computes the RMS value of the measured waveform (sine or otherwise). This is referred to as "True-rms" reading. This measuring system is accurate for any waveform. When an average sensing instrument is used on a non-sinusoidal waveform, measurement accuracy could

be off as much as 50%. Since you may not know what type of AC waveform you are measuring, a True-rms instrument should be used whenever possible.

Is it Hot or Not?

Why utility crews trust the Amprobe TIC 300 PRO

Feedback from a major US utility and the 30 underground crews who serve a North American city

In every truck, on every trouble call, there's one tool crews reach for first to ensure their safety. That's the TIC 300 PRO. It's the go-to tool for underground crews servicing secondary power lines for a large US utility company in the Northeast. The crew's work takes them down manholes under historic cities where the infrastructure is aging and the problems are frequent.

As lead engineer responsible for troubleshooting, John K. can get calls anytime day or night from one of 30 underground crews. When a cable installer or splicer encounters out-of-the ordinary electrical problems on the job, they call in a "trouble man". And when the trouble man has questions on how equipment operates, he calls John. John constantly stresses the importance of safety to all the crews. He tells them to always assume it's live until they know for sure. Whether they're working on 120 V, 240 V, 5k V or greater, on cables, transformers, or switches, they begin the job by checking to see if the problem area is live or dead. That's the job of the TIC 300 PRO non-contact voltage detector.

After two decades of using Amprobe TIC tracers, the crews know it, trust it, and feel safe – exactly what they need.

Approximately 300 TIC tracers are in use throughout the system. Every crew carries at least one and usually two units in the truck. The cable installers, cable splicers, and trouble men all use them daily, often multiple times each day. They might see an exposed conductor, or a cable that's been cut off or broken. Sometimes one crew starts a job on their shift and another picks it on the next shift, and they need to know for sure what they are walking into.

Lights flash and the TIC 300 PRO beeps with increasing frequency as it nears a source of electricity, leaving the user no doubt whether the area is live or not. They can also quickly track where fault lines between two functioning points.

The crews like how simple the TIC 300 PRO is to use. One bright yellow button turns it on or off. With another button, the user can select either low or high voltage. Buttons are easy to press with heavy gloves, which is important because the crew must wear gloves and full PPE.

The TIC tracers get thrown around in the truck, but the tools are durable enough to take the rough treatment. John has seen some units last more than 20 years.

After using the TIC tracer product line for more than two decades, the crews all know it, trust it, and feel safe with them. To ensure a particular unit is working properly, they can just press the Test button.

John is not only responsible for troubleshooting but also for bringing new products into the company, so he's knowledgeable about his tool choices. He's looked at competitive non-contact voltage detectors, but the trust factor keeps the TIC 300 PRO his number one choice. It does the job, it doesn't fail, and his crews trust it. And that's exactly what they need.

TIC 300 PRO High Voltage Detector

Rugged and reliable for utility, industrial, heavy manufacturing and mine safety applications, the Amprobe TIC 300 PRO with VolTest™ detects voltages in low, medium and high voltage applications with bright visual and loud audible alerts.

- Utility tool for checking transmission lines, power distribution equipment, down power lines, fuses, and load break connectors
- Lower voltage setting for checking voltage presence in breaker panels, breakers, power outlets and wiring
- Verifies presence of voltage from 30 V ac to 122,000 V ac (122 kV)
- MSHA certified and intrinsically safe
- Push button functionality for ease of use with PPE gloves
- Visual and audible voltage indication
- Self-test verifies tester works properly
- Ergonomic design with a convenient handle
- Drop-proof to 6' (1.8 m)

LT-10 Fluorescent Lamp Tester

Troubleshooting fluorescent lamps is as easy as 1-2-3, saving you valuable time and money. The Amprobe Fluorescent Lamp Tester is a problem solving tool designed to easily test whether fluorescent light bulbs and ballasts are working prior to installation or removal. The intuitive single button operation allows you to troubleshoot lamps and avoid wasteful disposal of fluorescent light bulbs and ballasts.

The compact tool easily fits in your pocket and the industry leading 48" antenna making it easy to test fluorescent bulbs while still in the fixture, often eliminating the need to stand on a ladder.

- Tests fluorescent (electroluminescent) lights
- Built-in VolTest™ non-contact voltage detection
- Filament pin test to check continuity of bulb
- Simple, one-handed, single button operation
- Ultra compact design for portability
- 48" removable, fully retractable antenna included to test lights and voltage without a ladder
- Compatible with all fluorescent light bulbs:
 - T2, T4, T5, T8, T9, T10, T12 Fluorescent energy saving light bulbs

FEATURE	LT-10
Compatible lamps:	T2, T4, T5, T8, T9, T10, T12 Fluorescent energy saving light bulbs
Test voltage:	Approximately 3 kV / 280 kHz
Field strength:	Approximately 100 µV/m at 260 - 300 kHz
Maximum antenna length:	48" (1.2 m)
VolTest™ non-contact voltage detection:	AC 90 V to AC 600 V, 50/60 Hz to CAT II 300 V, CAT I 600 V
Filament pin test	T2, T4, T5, T8, T9, T10, T12

INCLUDED ACCESSORIES:

48" antenna, adaptor plate, users manual, battery and carrying case

Troubleshoot fluorescent lamps in three quick steps.

Step 1: Bulb

Check bulb for presence of gas.

Step 2: Pins

Check pins for voltage continuity.

Step 3: Voltage

Check voltage presence with non-contact voltage detection.

If all three steps pass, replace the ballast.

INSP-3 Wiring Inspector

Verify in seconds whether a building's wiring complies with electrical code. Save time and money by testing more efficiently and identifying issues crucial to the safety and performance of an electrical system.

- Large display shows all relevant test data, no scrolling or switching screens needed
- Find faulty wiring that needs repair without removing outlet cover plates or panel covers, including:
 - Faulty splices and connections
 - Incorrect wiring
 - Undersized wiring
 - Faulty or incorrectly wired AFCIs/GFCIs
 - Incorrect line voltage
 - Poor ground quality
- Verify performance of electrical systems with user selectable 10, 15 and 20 amp loads
- Flashing screen clearly indicates incorrect wiring or voltage drop test failure
- Test without tripping circuit breakers or blowing fuses
- Check grounding for safety and ability to support sensitive electronic equipment

FEATURE	INSP-3	BEST ACCURACY
Load:	Constant 10, 15 or 20 AMP simulation regardless of line voltage	—
Operating Voltage:	95 V ac → 140 V ac	+/- 2% + 2 LSD
GFI Trip:	6.0 mA nominal to trip GFI, 30 mA to trip RCD	—
AFCI Trip:	Up to 8, 120 AMP pulses within 1/2 second period	—

INCLUDED ACCESSORIES: Power cord, 9 V alkaline battery (Installed), users manual, carrying case

INSP-3

Perform Voltage Drop Testing Without Overheating Faulty Lines.

Testing electrical lines under load provides more information on line conditions that one might expect. The National Electrical Code recommends a voltage drop less than 5% on both feeders and branch circuits under load.

High voltage drop and high ground impedance can result from many different issues, including poor splices or connections; undersized wiring for length of run; too many devices connected to the branch circuit; corroded connections; worn switch or circuit breaker contacts and faulty or worn outlets.

Voltage drop relates not only to safety, but also to the function and reliability of electrical systems, especially when modern electronic devices are used on the line.

Contrary to what many assume, electronic products such as computers, copiers, and office equipment can put significant loads on lines. This type of equipment also tends to be the most sensitive to disturbances that heavy loads can create, such as surges, spikes and low voltage.

Excessive voltage drop that is not corrected will often create one or several problems, including premature motor burn-out; component failure; "crashing" or loss of computer data; overheating of motors, electrical lines and other equipment; and highly sensitive lines that easily fluctuate from spikes, surges line noise and other factors.

In addition to marginal equipment operation, high voltage drop can also cause overheating associated with electrical files. This is an excellent reason to

protect your customers and yourself by checking drop under load.

If a line is not tested under load the system may have faults that will not be known until equipment is connected to the line. At this point, excessive voltage drop will almost surely create a callback.

Checking voltage drop under load is a great way to assure yourself and your customers that lines are in good condition, safe and will hold up for years of efficient operation. This test should not be overlooked in the service of electrical wiring systems.

PRM-4 Phase Sequence / Motor Rotation Tester

Phase sequence testing is crucial for many three-phase loads. Improperly connected motors can result in reverse rotation, which can damage the equipment powered by the motor. Ensure electrical equipment is correctly and safely connected with Amprobe's PRM-4.

- Identifies 3-phase sequence
- Open phase check
- Motor shaft rotation indicator protected by CAT III circuitry
- 3-phase to phase input voltage, 100 V ac to 600 V ac max
- 45 to 70 Hz frequency

Replacement Test Leads

INCLUDED ACCESSORIES: Test leads with alligator clips, carrying case, users manual, 9 V battery (installed)

MO-100 Milliohmometer

Spot potential failures fast with the portable, battery powered MO-100. Check for opens or shorts in motor windings, generators and transformers. Test heating elements and wire-to-wire resistance in critical electrical connections.

- Accurate four terminal measurement down to 100 $\mu\Omega$ without test leads resistance compensation
- Three test currents with over-temperature protection for measurement precision
- Protection against inadvertent connection to overvoltage
- Potential lead resistance, current lead resistance checks
- Indicates measurement errors due to temperature or connection problems
- Auto-hold and auto-off features
- Lightweight, robust and compact
- "O-Ring" sealed enclosure

VP-1000SB

Designed for safe and convenient, non-contact ac voltage detection without interruption to electrical systems, the VP-1000SB provides 3-way visual, audible and vibration alerts when ac voltage is present.

- Designed to discern between hot and neutral wires up to CAT IV 1000 V ac
- Safety rated for indoor and outdoor applications
- Test for ac voltage cables, circuit breakers, wall sockets, junction boxes, and fuses

FEATURE	VP-1000SB
AC Voltage Detection	90 → 1000 V ac
Indicator	Lights, Beeps and Vibrates
Safety Rating	CAT IV 1000 V

INCLUDED ACCESSORIES:
Users manual, batteries (installed)

VP-1000SB

VP-440 Non-contact Volt Probe®

Designed for safe, non-contact voltage detection, this voltage probe doesn't require much budget or demand much space. It fits conveniently in a shirt pocket, tool belt, or pouch.

- Safely check for ac voltages without disconnecting the electrical loads
- Test cables, circuit breakers, wall sockets, junction boxes, and fuses
- Completely insulated, with no exposed metal or conductive parts
- No current flow is needed for correct operation

FEATURES	VP-440
AC Voltage Detection	100 V → 1000 V
Indicator	Lights
Safety Rating	CAT III 1000 V

INCLUDED ACCESSORIES:
Users manual, batteries (installed)

VP-440

ST-101B / ST-102B Socket Testers

Easily check and confirm proper wiring of electrical receptacles with the Amprobe ST-101B and ST-102B Receptacle Testers. Quickly test sockets and confirm wiring and operation of AC outlets with the ST-101B and confirm that GFCI breakers are properly wired for protection with the ST-102B.

- Confirm proper wiring and operation of AC socket
- Easy-to-read lights indicate common wiring problems
- The trip test to confirm that GFCI protection is working properly (ST-102B only)
- For use on 110-125 V ac

FEATURES	ST-101B	ST-102B
AC Voltage	110 V → 125 V	110 V → 125 V

LAN-1 LAN Tester

With quick, go/no-go tests, you can find opens, shorts and miswired cable installations. You can either step through the test cable one at a time, or let the unit automatically pulse through the pin-outs and display the results.

- Remote termination module tests installed cable on wall plate or patch panels
- Perform loopback or remote tests
- Buzzer sound warns for error condition in cable
- Two sets of LED lights indicate source and test
- Maximum line length: 328 yards (300 m)

FEATURE	LAN-1
Cable Types Tested	10/100 base-T; 10 base-2; RJ45; AT&T 258A; EIA / TIA 568A/568B; Token Ring
Continuity Maximum Length	> 300 meters
Connector Types	RJ45, BNC

INCLUDED ACCESSORIES: Users manual, batteries (installed), remote terminator, RJ45 to female BNC cable, RJ45 to male BNC cable, RJ45 to RJ45 cable, Female BNC to Female BNC cable

Wire Tracers and Underground Locators

TECHNOLOGY

When you want to be absolutely sure you're digging in the right place, depend on the technology leader. No other systems even come close to the speed, reliability and accuracy of Amprobe Underground Cable and Pipe Locators. They are specifically designed for your electrical and utility applications. Amprobe invented Wire Tracer technology and continues to lead the industry today.

Wire Tracers

AT-3500 Underground Cable/Pipe Locator System

Keep productivity high and operational costs low, with the AT-3500. This rugged, economical solution helps you locate underground energized and de-energized wires, cables and pipes. Great for parking lot and airport lighting applications, it precisely pinpoints buried services, with exceptionally fast sound and meter response.

- Precisely pinpoint buried cables and wires
- Three testing modes for best accuracy:
 - Passive power (50 Hz / 60 Hz)
 - Passive radio (RF)
 - Active T-3500 signal generator with induction mode directly connected to the cable with test leads or optional clamp
- Proven 33 kHz frequency for most locating applications
- Avoid lines at utility construction sites with highly sensitive power and radio modes
- Take depth measurements up to 16' (4.9m)
- Backlit multiple-segment digital display with audible alerts to show and tell location of buried cables
- Semi-automatic gain control for fast signal location and control

AT-4000-A Series Advanced Wire Tracer

Amprobe invented wire tracer technology decades ago and continues to set the standard today. The most advanced of all wire tracers, the AT-4000-A Series combines the technology, features and functions to make wire tracing fast and precise.

- One universal transmitter automatically switches to trace energized and non-energized (open, broken) wires
- Receiver is not position-sensitive - get accurate readings without rotating
- Locates breakers, neutrals, and ground lines
- Locates and traces wires in walls, floors, conduit, and computer cables
- Pinpoints shorts, ground faults and broken wires
- Performs tests without having to interrupt power
- Does not interfere with sensitive electronic equipment
- Precise sensitivity adjustment
- Battery booster strengthens signal for open tracing
- Clamp-on attachment injects signal for non-contact operation

AT-4005-A

AT-1000 Wire Tracer

For basic applications where accuracy and routine troubleshooting are important, choose the Amprobe first-tier circuit tracer.

- Trace energized lines up to 300 V ac or V dc
- Trace unenergized and open conductors
- Identifies breakers and fuses without powering down
- Locates shorts
- Identifies wires in a bundle
- Identifies control, alarm and telephone system wiring
- Traces coaxial cable shield
- Receiver range 1 to 3 feet from a cable being traced

FEATURE	AT-1000
Trace energized lines up to 300 V ac or V dc	100 V → 125 V ac (X1000 Transmitter)
Range 1-3' from a cable being traced	R1000 Receiver

INCLUDED ACCESSORIES: Users manual, batteries (installed), transmitter, receiver, connection cables, carrying case

AT-1000

CT-100 and CT-326-C Current Tracers

For tough industrial applications, we recommend these heavy-duty current instruments to trace live wires buried underground or hidden behind walls up to 4' (1.2 m) deep.

- Performs tests without having to interrupt power
- Locates breakers, neutral and ground lines
- Locates and traces wires in walls, floors, conduit, computer cables, etc.
- Pinpoints shorts and ground faults
- Does not interfere with sensitive electronic equipment

FEATURES	CT-100	CT-326-C
Traces energized wires and locates breakers without interrupting power	9 V → 300 V ac/dc	9 V → 300 V ac/dc
Traces non-energized wires (continuity and grounded wire) and pinpoints shorts & ground faults	T-100 Transmitter & 9 V batteries	Transmitter & 9 V batteries
Digital filter to assure accuracy in noisy industrial environments	—	•
Sensitivity Settings	3	12

DM-III

Power Quality Counts

DM-III - Power Quality, Improving Plant Efficiency

★★★★★ TOP RATED

"Definitely worth the Investment"

"This meter has a lot of useful features that can be used to monitor services, equipment, generators or individual circuits. It can be used to record before and after any work done to document savings on power factor correction, energy efficient lighting, VFDs instead of cross the starters also used in Harmonic recordings."

- DM-III Multitest F customer reviews

The Superior Group, an electrical contracting company based in Columbus, Ohio, uses the Amprobe DM-III Multitest F Power Quality Recorder as a regular part of its business. The company works on a wide variety of projects, from very large data centers, to public works and even voice and data through its data vision.

"We are probably one of the larger electrical contractors in the area," said Rich Hartman, vice president of service and small projects for The Superior Group. "We employ approximately 150 people at this time and electrical construction makes up 60-70 percent of our business. We have 13 service trucks that will do anything from a one-hour service call to \$100,000 projects." Because of its diverse customer base, which includes Coca-Cola, Chase Bank and Abercrombie and Fitch, The Superior Group needs a flexible tool that can troubleshoot a wide variety of problems.

"The biggest thing we use the DM-III for are power issues with our industrial customers and even some of the new construction projects," Hartman said. "A lot of times we're looking at voltage problems, at motors or drives dropping out, so we'll go in and record for a week to see if the issues are power quality related or if it's something with the plant. Power quality has always

been an issue. We have done harmonics readings on some equipment for one of our clients. They were having harmonics issues on their drives, which we ended up putting on some capacitors to correct."

Including power quality analysis as a regular part of plant maintenance improves safety, saves energy as fuel prices skyrocket, and helps companies meet increasing emissions regulations. The Amprobe DM-III gives technicians a single, affordable tool with complex testing capabilities to take a global look at systems and run them efficiently.

"The thing I like about the Amprobe DM-III is that it's compact and easy to use"

"The thing I like about the Amprobe DM-III is that it's compact and easy to use," Hartman said. "It's a no-brainer to take out in the field and set-up. Everything about it is more user-friendly than what we used in the past."

Insulation / Ground Power Quality

EFFICIENCY

Reduce downtime, predict equipment life and cut energy costs with Amprobe tools. The Amprobe insulation resistance testers support your preventative maintenance programs while the Amprobe power quality tools help you conserve energy and keep your equipment operating at peak performance. Use the Amprobe ground testers to not only operate efficiently, but also safely.

Industrial High Voltage Insulation Testers

Professional insulation diagnostics, automated calculations and step voltage testing satisfy the most demanding applications. Accurately test cables, transformers, motors, surge arrestors and generators in noisy environments such as high voltage switch yards. Built-in noise rejection filters and shielded test leads provide high EMI immunity.

- Use one tester for low and high voltage systems with selectable test voltages:
 - AMB-50: 500 V, 1000 V, 2500 V and 5000 V
 - AMB-55: 250 V to 5000 V with 25 V increments
 - AMB-110: 500 V to 10,000 V with 25 V increments
- R(t) graph plots resistance in real-time to illustrate a response to the applied voltage
- Programmable timer
- Automatic discharge of test object after measurement is complete
- Measure and display all parameters simultaneously on large LCD
- Fast charging and testing
- Dual power source: receptacle or rechargeable batteries
- Built-in memory stores up to 1000 measurements with time and date
- Record and manage measurement data with PC Software via either RS232 or USB

GP-2A Ground Resistance & Resistivity Tester

For installation and troubleshooting, this instrument provides accurate and reliable measurements of ground resistance and soil resistivity to help you reduce power quality problems.

- Measures earth ground resistance with 3-point (fall of potential) or 2-point tests
- Calculates resistivity with 4-point test
- Automatic voltage measurement prevents false measurements
- Autoranging
- Store up to 999 measurements
- Create custom reports by downloading data to a PC

FEATURE	GP-2A
Ground Resistance	1999 Ω
Ground Resistivity	314 k Ω m
AC Current	—
AC Voltage	0 V – 460 V

INCLUDED ACCESSORIES: Users manual, batteries (installed), connection cables, 4 ground stakes, PC software and USB cable, carrying case

DM-III Multitest and DM-III Multitest F Power Quality Recorders

Cut energy costs and improve operating efficiency with the Amprobe full-featured three-phase Power Quality Recorders. They offer the essential functions and capabilities for today's demanding electrical environments.

- Measures and records a broad spectrum of power quality parameters with true-rms accuracy
- Compatible with a wide range of current transducers
- Works with single- and three-phase systems (Y and Delta)
- Detects and records voltage anomalies, sags and surges
- Tests insulation of wires, cables, transformers and electrical motors
- Programmable timer to perform the Dielectric Absorption Ratio Test
- Selectable polarization of ohmmeter for checking grounding continuity
- Built-in scope displays waveforms
- Manual and programmable recording start
- Ensure uninterrupted data recording with password protection
- Records up to 64 parameters (single- or three-phase) simultaneously
- Special data compression system and user selectable rates allow recording from several hours to several years
- Downloads measurements to PC with software
- Line or battery powered
- Automatic voltmeter protects against misuse on hazardous energized systems

FEATURE	DM-III MULTITEST	DM-III MULTITEST F
AC Voltage	600 V	
AC Current	1000 A	3000 A
Optional CTS	1000 A, 3000 A	100 A
Harmonics	THD, DC to 49th	
Power	W, VAR, VA	
Energy	Wh, WARh, VAh	
Voltage Anomalies	Sag / Surge	
Power Factor	0.00 +/- 1.00	
Frequency	50 / 60 Hz	
Phase Sequence	1-2-3	
Insulation Tester	50 V, 100 V, 250 V, 500 V, 1000 V	
Ground Resistance	Resistance & Resistivity	

INCLUDED ACCESSORIES: External power supply, users manual, test leads, ground resistance test leads with 4 ground stakes, carrying case, PC software with USB cable, 3 current transducers (1000 amps for Multitest and 3000 amps for Multitest F)

DM-III

★★★★★ TOP RATED

"Definitely worth the investment!"

"This meter has a lot of useful features that can be used to monitor services, equipment, generators or individual circuits. It can be used to record before and after any work done to document savings on power factor correction, energy efficient lighting, VFDs instead of cross the starters - worth the money."

- DM-III Multitest F customer reviews

IR-700 Series Infrared Thermometers

The Amprobe IR-700 Series Infrared Thermometers offer five IR thermometers with precision performance, unparalleled accuracy and response time. Specifically designed for HVAC/R, electrical, industrial maintenance, automotive as well as quality control and fire prevention applications.

- Distance to Spot ratio up to 50:1
- Wide temperature ranges
- Adjustable emissivity for measuring a variety of materials
- Min/max memory

INCLUDED ACCESSORIES: Battery (installed), users manual
Carrying case: IR-720, IR-730, IR-750
IR-750 only: K-type thermocouple, USB cable and software CD

Precision Performance

The Amprobe IR-750, Extremely High Accuracy and 50:1 Distance to Spot.

Instead of perching on a ladder or crawling on your hands and knees to take critical temperature measurements, use the advanced Amprobe IR-750 50:1 Infrared Thermometer to check supply and return registers, find leaky or broken ducting, map temperatures, check compressor lines and much more. With data-logging capabilities downloadable to PC and a K-type thermocouple inputs, you're able to take temperature measurements up to 1550°C (2822°F).

The larger the Distance to Spot (D:S) ratio, the better the resolution and the smaller the area that can be measured. The IR-750 with a D:S of 50:1, will measure a 1" diameter at a distance of 50" away, perfect for demanding quality and process control applications.

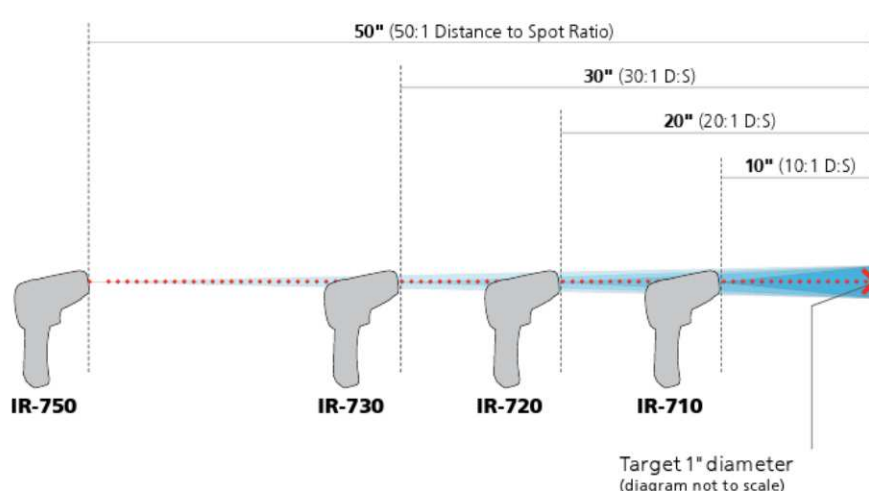

Get the most accurate measurements by following these basic guidelines:

- Get as close as safely possible to your target
- Know the D:S ratio for your thermometer. The area of the spot grows larger the further you are from the target
- If you need to measure a reflective target, mask it with flat black paint or black tape. IR thermometers calculate the surface temperature of an object by measuring the amount of energy emitted. Shiny or reflective objects have excess emissivity that can skew your temperature measurements.
- Experiment with several angles to capture the best reading and mitigate reflected energy

★★★★★
TOP RATED

"This IR thermometer has proven indispensable for board level troubleshooting as it helps find hot spots, overloaded components that are over stressed (hot) and gives accurate temperatures of the component. It helps in locating shorts and other problems which can cause failure to the assembly. Wonderfully easy to control in hand and be easy to read."

- IR-750 Infrared Thermometer, customer review

IR-450

IR-450 Infrared Pocket Thermometer, Flashlight and Laser Pointer

A must have tool for everyday applications, the IR-450 3-in-1 Infrared Pocket Thermometer, Laser Pointer, and Flashlight offers a uniquely small and convenient form factor with professional 8:1 distance to spot ratio. More portable than traditional infrared thermometers, quickly check temperatures in HVAC/R, fire safety and protection, industrial maintenance, automotive and quality control applications.

- 8:1 distance-to-spot ratio
- Bright laser pointer
- Built-in LED flashlight to illuminate dark areas
- Holds temperature reading (selectable °F / °C) for ten seconds

SPECIFICATIONS	IR-450
Range	-22°F → 932°F (-30°C → 500°C)
Distance to Spot Size	8:1 ratio
Best Resolution	0.5°F (0.2°C)
Best Accuracy	+/- 4°F (2°C)
Emissivity	Pre-set 0.95

INCLUDED ACCESSORIES: Battery (installed), users manual, pocket clip

IR608A

IR608A Infrared Thermometer with Laser Pointer

Point and press for quick and easy non-contact temperature measurement. Use this effective diagnostic tool to identify temperature for HVAC, fire safety and protection, industrial maintenance, automotive and quality control.

- Pocket-sized, ergonomic design
- Laser sighting for accurate targeting (CE EN60825 certified Class II)
- Display hold
- Fast response time
- Backlight display for visibility in a variety of working conditions
- Low battery indicator

SPECIFICATIONS	IR608A
Range	0°F → 750°F (-18°C → 400°C)
Distance to Spot Size	8:1 ratio
Best Resolution	0.5°F (0.2°C)
Best Accuracy	+/- 2% of reading or +/- 3.5°F (+/- 2°C) whichever is greater
Emissivity	Pre-set 0.95

INCLUDED ACCESSORIES: Battery (installed), users manual

THWD-3 and TH-3 Relative Humidity and Temperature Meters

An exceptionally wide ambient temperature range makes these meters versatile and accurate.

- Large LCD displays two measurements simultaneously
- Extended probe stem for easy access to air ducts
- Dew point and wet bulb (THWD-3 only)
- Min/max readings
- Temperature measurement range: -4°F (-20°C) to 140°F (60°C)
- Data hold
- Capacitive sensor with protective cover
- Auto power-off

INCLUDED ACCESSORIES: Carrying case, battery (installed), users manual

THWD-3

TH-1

TH-1 Compact Probe Style Relative Humidity Meter

Slip this little meter in your pocket and be ready for quick temperature and humidity checks.

- Displays relative humidity and temperature simultaneously
- Measure wet bulb and dew point
- Precision capacity relative humidity sensor with twistable protective cap
- Results in metric or English
- Stores min/max readings for comparisons
- Data hold

FEATURE	THWD-3	TH-3	TH-1

THWD-5 Relative Humidity and Temperature Meter with Wet Bulb and Dew Point

Designed for HVAC technicians and plant maintenance engineers, this microprocessor-based psychrometer provides quick, easy access to wet bulb and dew point values as well as temperature and relative humidity.

- Extended probe for easy access to targets
- Large digital dual display with backlight makes readings easy-to-see
- Temperature with 0.1 degree resolution in °F or °C, front panel selectable
- Stores min/max measurements
- Data hold freezes last reading
- Tripod mountable

TMD-50 Series Thermometers

The professional choice for HVAC technicians, electricians and research, industrial process, and quality control applications, these thermometers offer dual inputs for easy super-heat and sub-cool temperature measurements. Monitor and track temperatures, the multi-logging thermometers feature real-time clocks with a calendar, user-selectable recording intervals, and easy data recall using up and down keys.

- °F/°C selectable
- Dual input: T1, T2, T1-T2
- Audible alert with Hi/Lo settings for out-of-range measurements
- Min/max with elapsed time, average, relative, hold functions
- Time and relative settings
- In-field thermocouple offset adjustment
- Robust holster protects the instrument
- Auto power-off saves batteries

TMD-56

Customer reviews

Temperature Ranges for TMD-56 series depending on thermocouple:

THERMOCOUPLE TYPE	TEMPERATURE RANGE
K-TYPE	-328°F → 2501°F (-200°C → 1372°C)
J-TYPE	-346°F → 2192°F (-210°C → 1200°C)
T-TYPE	-328°F → 752°F (-200°C → 400°C)
E-TYPE	-346°F → 1832°F (-210°C → 1000°C)
R-TYPE	32°F → 3212°F (0°C → 1767°C)
S-TYPE	32°F → 3212°F (0°C → 1767°C)
N-TYPE	-58°F → 2372°F (-50°C → 1300°C)

TMD-50

These highly accurate thermometers give precise measurements on a large, easy-to-read backlit display. The robust holster protects the instrument. Auto power-off saves batteries.

- Dual input: T1, T2, T1-T2 °F/°C selectable
- Average/relative zero functions
- Min/max/hold functions
- In-field thermocouple offset adjustment

INCLUDED ACCESSORIES: Users manual, 2 K-type thermocouples, 4 batteries (installed)

TMD-50

TMD-53

When your application demands even higher accuracy, choose these models. An audible alert with Hi/Lo settings detects out-of-range measurements.

- K/J-type thermocouple selection
- Dual input
- Min/max with elapsed time, average, relative, hold functions
- Time % relative settings
- 0.05% basic accuracy to 0.2°F (0.1°C) resolution
- °F/°C selectable

INCLUDED ACCESSORIES: Users manual, 2 K-type thermocouples, batteries (installed)

TMD-53

TMD-56

Monitor and track temperatures with these multi-logging thermometers. All models feature a backlit triple-display, real-time clock with calendar and user-selectable recording intervals with easy data recall.

- Download data to PC via USB
- Data capture: 256 samples with real-time data
- Data logging: 16 sets, maximum 16,000 data points
- Thermocouple offset adjustment
- Record, max, min, max-min, average, relative zero and hold functions
- Audible alerts with Hi/Lo setting
- Resolution 0.1°F/1°F (0.1°C/1°C)

INCLUDED ACCESSORIES: USB cable and software, users manual, 2 K-type thermocouples, batteries (installed)

TMD-56

TR200-A

TR200-A Temperature and Relative Humidity Data Logger

One compact unit monitors both temperature and humidity and records it on your PC using the USB interface. Amprobe software included.

- Record sample interval timing, start/stop, date, time, Hi/Lo alarm threshold, and units
- Visible LED warnings alert you to air quality problems
- IP-65 rating for dust and moisture
- Wall mountable

TR300

TR300 Temperature and Relative Humidity Data Logger

Wall-mountable, self-standing, or tri-pod mountable, this data logger configures to your application.

- Temperature, relative humidity, dew point or web bulb measurements with real-time date/hour stamp
- Audible and visual alerts help you monitor IAQ conditions
- Stores up to 16,000 readings
- Records data to a PC with USB cable and Amprobe software included
- Programming on-screen or from the PC

FEATURES	TR200-A	TR300
Dual Display LCD	—	•

MT-10 Moisture Meter

Measure the moisture content of wallboard, wood, mortar, plaster or other building materials to identify areas of water damage or harmful mold growth. Check wood or concrete flooring before installation, wood during drying or before woodworking.

- Three-color LED indicates moisture severity
- Backlight makes display visible in dim areas

INCLUDED ACCESSORIES: Users manual, battery

MT-10

★★★★★

TOP RATED

"If you build quality, this is your tool."

"I watched the Amprobe MT-10 in action when my insurance adjuster came to check out ceiling damage. The rafters without visible water damage showed moisture, the insulation that needed replacing was quickly identifiable and the wall showed the path the water took to the next floor. Wow, this will save waiting to see mold or disintegration long before permanent damage."

- MT-10 customer review

TMA5 Mini Vane Anemometer

This pocket-sized tool gives you an easy way to measure air flow, temperature and humidity in the HVAC systems of residential, commercial or industrial buildings.

- Measures air velocity, temperature and ambient temperature (in °F or °C), humidity, dew point, wet bulb, wind chill
- Simple, two-button operation
- Selectable wind units: KNT, BF, ft/m, mph, m/s, km/h
- Maximum wind speed display
- Data hold
- Auto power-off with disable feature
- Low battery indication
- Ergonomic design with wrist strap
- External temperature probe included

TMA5

FEATURE	TMA5
Wind Speed Range	0.5 → 44.7 mph, 60 → 3937 ft/m, 0.4 → 38.8 knt, 1.1 → 20.0 m/s, 0.7 → 72.0 kmh, 1 → 8 BF
Air Temperature Range	32°F → 122°F (0°C → 50°C)
External Temperature Range	-4°F → 158°F (-20°C → 70°C)

TMA10A Anemometer with Flexible Precision Vane

The essential tool for HVAC technicians, the TMA10A measures air velocity or volume (CFM), plus temperature. Just enter surface area type for accurate airflow measurements.

- Large dual display for viewing airflow or velocity measurement including temperature
- Long flexible cord to access remote vanes
- Continuous moving average for up to 2 hours
- Air velocity average for up to 8 points
- Multi-point air flow (cfm) average
- PC interface for charting or analysis
- Min/max/average reading on a single point
- Data hold
- Auto power-off function

FUNCTION	RANGE	BEST ACCURACY
Air Velocity	0.40 → 25.00 m/s	+/- 2% of full scale

TMA-21HW Hot Wire Anemometer

Hot wire anemometer technology eliminates bearings and rotating parts to make these meters durable and measurements stable and accurate. It's the simple, safe way to monitor indoor air quality and measure air flow and temperature in residential, commercial and industrial air conditioning systems.

- 4' (1.2m) telescopic wand - no ladder needed for most commercial applications
- Measures air flow volume in CFM, CMM
- Instant average, 2/3 Vmax flow measurements
- Velocity m/s, ft/min, knots, km/hr, mph
- Relative humidity and temperature measurement
- Data hold, min/max with time stamp
- Data memory and real-time function (99 sets)
- 512KB auto data-logging capacity
- USB interface
- Wet bulb and dew point
- Large backlight LCD display shows five parameters

FEATURE	TMA-21HW	BEST ACCURACY
Air Flow	0.10 m/s → 30.00 m/s 0.2 km/hr → 110.0 km/hr 10 ft/min → 6000 ft/min 0.10 knots → 59.0 knots 0.12 MPH → 68.00 MPH	+/- 3% of rdg +/-1%FS

RLD-1 Refrigerant Leak Detector

Troubleshoot air conditioning systems quickly and accurately with the RLD-1. State-of-the-art technology makes it easy to precisely pinpoint a wide variety of halogenated refrigerant leaks.

- Detects R-134a, R-404a, R-407c, R-410a, R-22, Freon and other refrigerants
- Sensitive gas sensor and advanced digital signal processing for high accuracy
- Built-in suction pump for precise sensor response
- Tri-color LED display and audio clearly indicate leaks
- High-Medium-Low (H/M/L) leak sensitivity selector
- Automatic zero and background compensation
- Low battery indication
- Ambient concentration reset

FEATURE	RLD-1
Detectable Gases	R-134a, R-404a, R-407c, R-410a, R-22, Freon
R-22, 134a Sensitivity	H - 3g/year, M - 15g/year, L - 30g/year
R-404a, 407c, 410a Sensitivity	H - 4g/year, M - 20g/year, L - 40g/year
Alarm Method	Buzzer, Tricolor LED bar Indicator
Power Usage	2 C size (3V dc) Alkaline Batteries
Snake Tube Length	15.5" (40 cm)

"Best tool for the job!"

In over 25 years of business, I've seen units with suspected refrigerant leaks but were too small to find. With the Amprobe RLD-1 refrigerant leak detector I can take the guess work out of finding and repairing a refrigerant leak. I recommend that if you are in the HVAC business this is a must have for every tool bag!"

- RLD-1 Customer reviews

GSD600 Gas Leak Detector

Detect dangerous methane or propane leaks that can lead to explosions and gas poisoning. With its five-level LED and audible alarms, the GSD600 helps you assess whether the area is safe or needs to be vented. The frequency of the beeping increases with the concentration of the gas, allowing you to pinpoint the source of the leak in piping or appliances. The display provides an accurate measurement of the gas present in the area.

- Detects combustible gases
- Quickly identifies and pinpoints gas leaks for closed piping systems
- Automatic calibration feature level LED alarm: >40, >80, >160, >320, and >640 ppm
- Mute function and LED alerts for quiet areas
- Built-in earphone jack (earphones not included) for loud environments
- Flexible probe to access difficult measurement areas
- Auto power-off

FEATURE	RANGE
Methane	40 ppm → 640 ppm
Propane	35 ppm → 580 ppm
Sensitivity	35 ppm (propane)

GSD600

Ultrasonic Leak Detectors

When leaks occur in pressurized systems, they emit an ultrasonic frequency humans can't hear. These ultrasonic leak detectors convert the sounds into an audible range for fast, easy leak detection.

ULD-300 Ultrasonic Leak Detector

Quickly locate gas leaks in pressurized air lines, steam lines, and refrigeration systems regardless of gas type (CFC, HFC, nitrogen and other non-combustible gases).

- Locates arcing in an electrical system
- Finds the ends of buried PVC pipes
- Parabola shield reduces background noise
- Access difficult or dangerous areas with extension tube

INCLUDED ACCESSORIES: Flexible tubing adapter, tubular extension, carrying case, power parabola, headphone, batteries (installed)

ULD-300

TMULD-300

TMULD-300 Ultrasonic Leak Detector with Ultrasonic Transmitter

When leaking gases are not sufficiently pressurized, use the TMULD-300. It includes an ultrasonic transmitter that creates sound waves so you can check door or trunk seals for air tightness, or windshields for water tightness.

- Same features as ULD-300
- Transmitter "pressurizes" an area with ultrasonic sound

INCLUDED ACCESSORIES: Flexible tubing adapter, tubular extension, carrying case, power parabola, headphone, batteries (installed), UT-300 transmitter

★★★★★
TOP RATED

"Great product."

"This tool paid for itself many times over. I have found leaks large and small inside walls, on evaporator coils, condensers and water lines. I've loaned it to colleagues who purchased your product immediately after using mine. These tools lead the industry in leak detection through its sensitivity and ability to detect negative or positive pressure."

TE-1 tubular extension (Replacement part)

CM-100

CM-100 Carbon Monoxide Meter

This compact meter measures the presence of carbon monoxide and warns you when it exceeds safe levels.

- Alarm is preset to 25 ppm to warn about possible danger
- Adjustable CO warning levels: 25, 30, 35, 45, 50, 70, 100 and 200 ppm
- Backlight for viewing in dim areas
- Auto power-off to save batteries
- Self-test feature
- Dual digital backlit display

FEATURE	CM-100
Range	0 ppm → 999 ppm
Resolution	1 ppm

INCLUDED ACCESSORIES: Users manual, batteries (installed)

CO2-100

CO2-100 Handheld Carbon Monoxide Meter

Get instant feedback on carbon monoxide levels up to 9,999 ppm, while you check the air quality compliance of hospitals, schools, offices, or production floors.

- Large, easy-to-read triple LCD display of CO₂, temperature and relative humidity
- Selectable display of dew point and wet bulb
- High performance low-drift sensor designed with NDIR (Non-Dispersive Infrared) waveguide technology
- Backlight for working in dim areas
- TWA (time-weighted average) display for an 8-hour period
- 15 minutes STEL (short-term exposure limit) value
- Audible alarm threshold setting by carbon dioxide level
- Data hold, min/max, average functions
- Long term drift compensation for accurate readings

INCLUDED ACCESSORIES: Batteries (installed), users manual, carrying case

★★★★★ TOP RATED

"Consistent calibration and fast updating."

"I use this tool to check environmental CO₂ conditions in theaters and in the field. The range is good with humidity readings that went to 3% in Colorado sub-alpine desert and CO₂ readings that topped the 9,999 ppm limit in productions."

- CO₂-100 Customer reviews

FEATURE	CO2-100	CO2-200
CO ₂	0 → 9999 ppm	0 → 9999 ppm
Temperature Range	14°F → 140°F (-10°C → 60°C)	14°F → 140°F (-10°C → 60°C)
RH Range	0% → 95%	0% → 95%
DP (Dew Point Temp.)	-4°F → 139.8°F (-20°C → 59.9°C)	-4°F → 139.8°F (-20°C → 59.9°C)
WB (Wet Bulb Temp.)	24.8°F → 139.8°F (-5.0°C → 59.9°C)	23°F → 139.8°F (-5.0°C → 59.9°C)
Resolution	1 ppm - CO ₂ concentration, 0.1°C / °F - Temp, 0.1%RH - Humidity	1 ppm - CO ₂ concentration, 0.1°C / °F - Temp, 0.1%RH - Humidity

CO2-200

CO2-200 Wall-Mounted Carbon Monoxide Meter

Monitor critical, environmentally controlled areas such as laboratories and production facilities with this permanently mounted air quality meter.

- CO₂ measurements up to 9,999 ppm, temperature, relative humidity, dew point and wet bulb
- Audible alarm threshold setting for carbon dioxide levels with output drive relay to control air flow system
- High performance low drift sensor designed with NDIR (Non-Dispersive Infrared) wave guide technology with automatic background calibration
- Recording of min, max and average values with recall function
- Data hold

INCLUDED ACCESSORIES: Batteries (installed), carrying case, power adapter 110-240 V ac, users manual

TACH-10 and TACH20 Combo Tachometers

Measure rotational speed of motors, conveyor belts and other moving or rotating systems with these handheld tachometers. The TACH-20, our top-of-the-line tachometer includes six adapters, a surface speed wheel for contact RPM measurement and an infrared beam for non-contact measurements. The TACH-10 is an economical, universal tachometer that measures rotational and surface speed using both contact and non-contact methods.

- Built-in memory function automatically stores maximum, minimum, and average values as well as the last measurement displayed
- Easy to select units and mode functions
- Select RPM using infrared beam or adapter: m/min, m/sec, ft/min, ft/sec, in/min, m, ft, and in.
- Auto power-off function

FEATURE	TACH-10	TACH20
Rotation (Non-Contact)	10.0 rpm → 99999 rpm	1 min → 99999 min
Rotation (Contact)	10.0 rpm → 19999 rpm	1 min → 19999 min
Surface Speed (Contact)	1.0000 → 9999.9 m/min 3.0000 → 30,000 ft/min 1.0 → 10,000 yd/min	0.10 → 1999 m/min 0.40 → 6550 ft/min 4.00 → 78700 in/min 0.10 → 33.30 m/sec 0.10 → 109 ft/sec

INCLUDED ACCESSORIES: Batteries (installed), users manual, reflective tape, carrying case, adapters

TACH-10

TACH20

Recommended Accessories

- TACH-20-KIT1** Tip, Wheel, Shaft, Funnel and Reflective Tape (TACH-20 Replacement part)

- TACH-10-KIT1** Convex / Concave Tip, Reflective Tape (TACH-10 Replacement part)

LM-100 and LM-120 Light Meters

These portable, easy-to-use digital light meters measure interior illumination levels from fluorescent, metal halide, high-pressure sodium or incandescent sources. Switch off, reduce or increase the output level of lighting fixtures. Reduce the energy burden of the building by significantly increasing the efficiency of its lighting system.

- Measure in lux or footcandles, front panel switchable
- Simple, one-handed operation
- Silicon photodiode sensor and filter for accuracy and high-resolution
- Analog dc voltage output to operate with chart recorder or data logger (LM-120 only)
- Zero adjustment (LM-120 only)
- Auto power-off to save battery life

FEATURES	LM-100	LM-120
Ranging	Manual	Automatic / Manual
Illumination Sensor	Silicon photodiode and filter	
Range Lux	20, 200, 2000, 20000, 200000	
Range Footcandles	20, 200, 2000, 20000	
Calibration Point	2854 °K Cosine Angular corrected per JIS C 1609:1993 and CNS 5119 general A class	
Data	Data hold	Data hold, min/max

INCLUDED ACCESSORIES: Batteries (installed), carrying case, users manual

LM-100

★★★★★
TOP RATED

"Excellent meter for lighting uses."

"I've found this meter's accuracy is as advertised at +/- 3%, its consistency under flickering AC driven LEDs (120Hz) is actually better than higher end meters that are unable to compute the samples accurately. Overall, an impressive meter at a great price, that I use for rough photometric tests as well as general illumination measurements."

- LM-200LED customer reviews

LM-200LED Light Meter

This professional tester accurately measures light output of LED sources for all visible light ranges.

- Lux or footcandle measurement units, user selectable
- Data hold
- Max recording captures highest light measurement
- Measuring lights source include all visible ranges
- Accurate measurements with spectral response close to CIE luminous spectral efficiency
- Angled light cosine correction
- Extendable wire (approximately 5' (1.5 m))
- Measurements according to JISC1609:1993 and CNS 5119 general A class specifications

FEATURE	LM-200LED	BEST ACCURACY
LED Light Measurement	200, 2,000, 20,000, 200,000 lux	+/- 3% (Calibrated to standard incandescent lamp 2856° K) and corrected LED day white -light spectrum.
	20, 200, 2,000, 20,000 footcandle	

INCLUDED ACCESSORIES: Users manual, battery (installed), carrying case

LM-200LED

For ordering information see page 63. For detailed specifications go to www.Amprobe.com

SM-10 and SM-20-A Sound Meters

These sound meters meet the measurement needs of safety engineers, health, industrial and safety offices as well as quality control. Use them to check compliance with safety regulations and perform acoustic analysis. They use two different weighting filters required by the IEC 651 and ANSI S1.4 Type 2 for audio filtering.

- A-weighting for general noise sound level
- C-weighting for measuring sound level of acoustic material control in various environments
- Display with 0.1dB steps on a 4-digit LCD
- Slow (1 sec) and fast (125ms) response
- settings to check peak and average noise levels
- PC interfaces (SM-20-A only)

SM-20-A

★★★★★ TOP RATED

"I work in a manufacturing plant and regularly check sound levels to make sure we are using the right hearing protection. We have been using the Amprobe SM-20-A Sound Meter for its ease of use and simple operations, and quick and easy testing. Love it and recommend it to everyone."

- SM-20-A
customer reviews

FEATURES	SM-10	SM-20-A
Microphone	1/2" Electret condenser microphone	
Standard Applied	IEC 651 Type 2, ANSI 1.4 Type 2	
Dynamic Range	50 dB	
Time Weighting	FAST (125 ms), SLOW (1 sec)	
Frequency Range	31.5 Hz → 8 kHz	
Measuring Level Range (Auto Range)	A-Weighting: 30 dB → 130 dB C-Weighting: 35 dB → 130 dB	
Data	Data hold	Min/max
Internal Memory	—	14,000 records

INCLUDED ACCESSORIES: Carrying case, users manual, battery (installed), USB cable download and software CD (SM-20-A only)

SM-CAL1

SM-CAL1 Sound Meter Calibrator

This instrument generates the fixed sound level signals needed to calibrate sound level meters.

- Two output levels: 94 dB and 114 dB
- Output frequency: 1000Hz
- Fits 0.5" microphones
- Easy one-handed operation
- Low battery indicator
- CE: conforms to ANSI S1.40 – 1984 and IEC942 – 1988 Class 2

INCLUDED ACCESSORIES: Battery (installed), users manual

Solar Energy and Battery Testers

GREEN

You need to be ready to test and troubleshoot new technologies as they emerge and alternative energy is the hottest trend. The Amprobe solar solution suite equips you to install, maintain and troubleshoot solar systems as well as analyzing the energy efficiency of solar panels, water heaters and windows. Use the Amprobe line of battery testers not only for green energy applications but also to test UPS and battery back-up systems.

5 Out of 5 Stars

See The Top Rated SOLAR-100 Solar Power Meter

Solar-100

SOLAR-100 Power Meter

Optimize the placement of solar systems and analyze window efficiency with the SOLAR-100. Measure solar output and calculate overall energy and efficiency.

- Windows performance testing: calculate and verify heating or heat reduction caused by direct sunlight
- Research the location of solar panels or solar water heaters
- Measures solar power and transmission
- Power mode measures incident solar radiation
- Transmission mode calculates the percentage of solar power transmission through materials such as windows
- Convenient display with remote sensor technology
- Selectable measurement units (W/m² or BTU/ft²·h)
- Min/max function identifies locations with maximum or minimum power
- Also useful for physics and optical laboratories, meteorology, agriculture

FEATURE	SOLAR-100
Solar Power	Up to 2000 W/m ² , 634 BTU/(ft ² ·h)
Max/Min	•
Data Hold	•

INCLUDED ACCESSORIES: Battery (installed), carrying case, users manual

★★★★★ TOP RATED

"A great instrument."

"This is an excellent device for quick measurements of irradiance out in the field. I was surprised that it can measure BTUs as well as headlight brightness and window tint."

It can also demonstrate the advantages of tracking and the effects of cloud cover. Great value for the money."

- SOLAR-100
customer reviews

SOLAR-600

SOLAR-600 Solar Analyzer

Install, maintain, troubleshoot and evaluate the efficiency of solar panels with this these professional analyzers. The SOLAR-600 also offers real-time data logging and PC downloads for further analysis.

- Determine the proper inverter size and optimum power output position of panels
- Identify broken or worn-out cells
- I-V curve test with cursor for solar cells
- Maximum solar power (Pmax) search by auto-scan
- Maximum voltage (Vmaxp) at Pmax
- Maximum current (Imaxp) at Pmax
- Voltage at open circuit (Vopen)
- Current at short circuit (Ishort)
- I-V curve with cursor
- Calculation of panel efficiency (%)
- Manual single point test
- Real time datalogging and PC download (SOLAR-600)

FEATURE	SOLAR-600
DC Voltage:	0.000 V → 9.999 V, 10.00 V → 60.00 V
DC Current:	0.01A → 9.99 A, 10.0 A → 12.0 A
DC Current Simulation	0.01 A → 9.99 A, 10 A → 12 A
Power	0 W → 720 W
Efficiency	•
Scan delay	0 mS → 3000 mS
Alarm	•
Solar Panel Area	0.001 m ² → 9999 m ²
Standard Light Source	10 W/m ² → 1000 W/m ²
Data Storage Memory	99 records
Data Logging	•

INCLUDED ACCESSORIES: Users manual, rechargeable battery pack (installed), ac adapter, USB cable and software CD, test leads, carrying case

Recommended Accessories

SOLAR-BAT1 Rechargeable Lithium Battery
SOLAR-600
(Replacement accessory)

BAT-200 Battery Testers

Battery failure is one of the most common causes for sensor or instrument failure. This portable universal battery tester makes checking batteries simple.

- Easy-to-read color-coded display with "Good", "Low" and "Replace/Recharge" indicators
- Compact design
- Tests standard and rechargeable batteries: 9V, AA, AAA, C, D, 1.5V Button Type
- Ergonomic battery holder

FEATURE	BAT-200
Battery Type	9V, AA, AAA, C, D, 1.5V Button Type
Analog Scale	•

INCLUDED ACCESSORIES: Users manual

BAT-200

BAT-500 Battery Tester

Here's the quick, accurate way to test back-up batteries and UPS systems without taking batteries off line.

- Comparator function to quickly access battery condition as Pass, Warning or Fail
- Resistance measurement up to 40 ohms and voltage up to 40 V
- Store up to 99 user program able settings for quick battery diagnostics
- Simultaneously measure battery resistance and voltage
- Test battery impedance to calculate its true life
- Compact and lightweight
- Works with most batteries: compact storage batteries, alkaline and lead-acid up to 500 Ah
- For trending/life cycle analysis download test results to a PC

FEATURE	BAT-500
Maximum Battery Capacity	Up to 500 amp hours
Battery Type	Alkaline, Nickel-Metal Hydride (NiMH), Nickel-Cadmium (NiCd), Lithium-ion (Li-ion) and lead-acid batteries
DC Voltage	4.000 V, 40.00 V
Impedance	40 mΩ, 400 mΩ, 4 Ω, 40 Ω
Data Capture Memory	500 data sets
Data Logging Memory	9600 data sets
PC Download	•

INCLUDED ACCESSORIES: Users manual, software manual, batteries, ac adaptor, RS232C (to USB Bridge) cable, software CD, kelvin clips

BAT-500

CR50A

LCR55A

CR50A Inductance, Capacitance and Resistance Tester

Inspect and verify components for quality control by quickly checking circuits with this full-range capacitance and resistance meter.

- Dual zero adjustments pots to null strays and test leads
- Special "low ohms" range
- "Zero adjust" pots for low ohms and capacitance ranges
- Low battery indication

LCR55A Capacitance Tester

The ultimate electronic component verifier measures inductance, capacitance, resistance, transistors, diodes and microwave diodes.

- Plug-in test slots and test leads with threaded alligator clips for precision testing
- Data hold and max hold
- "Zero adjust" pot for ohms
- Low battery indication
- Auto power-off

FEATURE	CR50A	LCR55A
Resistance	20 Ω, 200 Ω, 2 kΩ, 20 kΩ, 200 kΩ, 2 MΩ, 20 MΩ	20 Ω, 200 Ω, 2 kΩ, 20 kΩ, 2 MΩ, 20 MΩ
Capacitance	200 pF, 2000 pF, 2 μF, 20 μF, 200 μF, 2 mF, 20 mF	200 pF, 2000 pF, 2 μF, 20 μF, 200 μF, 2 mF
Inductance	-	200 μH, 2 mH, 200 mH, 200 H
Transistors	-	Hfe, I _{ceo} (NPN, PNP)
Diodes	•	Std (3 V) & microwave oven (8 V)
Continuity test		•

INCLUDED ACCESSORIES: Users manual, test leads with alligator clips, battery (installed)

★★★★★ TOP RATED "Very reliable."

"We work in the HVAC industry and capacitors are a common issue. The Amprobe LCR55A Capacitance Tester has been a great investment and time saver. A quick check and record has identified weak capacitors and saved us from costly call backs."

- LCR55A customer reviews

R-115S

RC-120S

R-115S Remcon Momentary Switch Relay (3-wire) RC-120S Remcon Closet Light Relay (2-wire)

When you need low-voltage control circuits for safe operation in industrial and process control environments, choose these low-voltage relays with built-in transformers. Each unit operates independently, so you can install one relay and operate it with as many switches as needed or control multiple relays with a single switch.

- Uses light 22 gauge wire, saving the time and expense of pulling Romex or armored cable
- Simplifies wiring – no need to wire back to separate low voltage transformers
- Operates silently so you can install relays at the fixture instead of at a remote location

FEATURE	R-115S	RC-120S
AC Voltage	105 V → 125 V	
AC Current	Up to 6.5 A (1/4 HP max motor load at 120 V)	
Frequency	60 Hz	
Safe Control Switching, Maximum	10 V dc 10 milliamps	

Accessories

OPTIMIZE

Get the most out of your Amprobe tools with a wide range of carrying cases, probes, current transducers, test leads, software and more. Please review your owners manual or visit www.Amprobe.com for complete details on the right accessories to support each test tool.

DL243D

Test Leads

DL243D

48" long silicone lead wires, probe tips, alligator clips, spade lugs, fold-out carrying case

DL248D

DL248D

Same as DL243D plus spring loaded crimp tips and red tip length extender

TL35B

TL35B

Standard leads: 40" PVC insulated lead with standard tips plus threaded large alligator clips, CE approved alligator clips, 0.6" jaw, shrouded 90° banana plugs, one red and one black leads and clips

TL1500

TL1500

Heavy duty test leads
CAT IV / 1000 V, 1500 V MAX

ELS2A

Line Splitter

ELS2A, AC Line Splitter

- Measures load current without splitting line cord
- Two measurement points, X1 and X10 for increased sensitivity
- Built-in voltage measurement jacks
- 115 V, 15 A

Current Clamps

CT235A

- AC/DC current clamp, 1000 A (50/10 kHz), mV output, 1.2" max conductor

CT237B

- AC/DC current clamp, 200 A (50/10 kHz), mV output, .75" max conductor

CT238A

- AC/DC current clamp, 20 A (50/20 kHz) Low current version

Thermocouple

TPK-59, Thermocouple

- Accessory for multimeters and clamp-ons with temperature input
- Measures temperature from -50°F → 600°F
- Plugs directly to a meter without additional adapters

Software and Cables

Transfer measurement data to your computer with these kits.

For complete details on Amprobe software and to download the latest versions, please visit www.amprobe.com/softwaredownloads.html

Download Suite Software

Download Suite is a free software package compatible with most of the Amprobe instruments with download capabilities. Enjoy the benefits of this powerful software package for a wide selection of Amprobe megohmmeters, ground resistance testers, multimeters, and power quality recorders.

- Install software once and use it with all supported Amprobe products
- All instruments share the same file format. You can open files recorded by you, other people, or the Amprobe instruments right on your PC.
- Download Suite automatically checks your version for upgrades and keeps your version current.
- Windows7 compatible

USB-KIT2

- Download software with connection cable for Amprobe clamp meters

USB-KIT3

- Download software with connection cable for Amprobe multimeters

RS-USB, USB to RS-232 Adapter

- Converts the USB port of a PC to RS-232
- Supports Windows 95 (OSR2X), 98, 2000, ME, XP, Vista, Mac 8.6 and higher
- Works with Amprobe instruments with download capabilities
- Works with many other products with USB ports, including cameras, Palm Pilot, card readers, mouse, security systems, etc.
- Frees up the serial port for other uses

TM-SWA, USB Cable and Software

- Allows for real-time data downloads from TMA10A and TMD90A
- Records two channels simultaneously

USB-KIT2

USB-KIT3

2014

AMPROBE®

HARD AT WORK SINCE 1948.

TOP RATED

Every year, Amprobe introduces innovative tools that help you work smarter, faster and make every dollar count. These are just a few examples of products you'll find inside the 2014 catalog.

- **LT-10 Lamp Tester:**
Troubleshoot bulbs, pins and voltage with a single pocket-sized tool.
- **IR-700 Infrared Thermometer Series:**
Five highly accurate IR thermometers with up to 50:1 distance to spot ratio.
- **AM-500 Digital Multimeter Series:**
Six best in class multimeters for every application.
- **Navigator™ Clamp Series:**
Rugged design and built-in power quality trouble-shooting capabilities.
- **IR-450 Pocket Thermometer:**
3-in-1 Infrared thermometer, laser pointer and flashlight.
- **TIC 300 PRO Non-Contact High Voltage Detector:**
The new standard in high voltage detection.
- **INSP-3 Wiring Inspector:**
Troubleshoot wiring issues in seconds.
